

Syllabus

2021 - 22

CLASS - VI

DAY PUBLIC SCHOOLS

ODISHA ZONE-II

Managed by : DAV College Managing Committee, New Delhi

FORWORD

A syllabus helps every teacher and student to know clearly the topics to be taught and the concepts to be learnt. And a Split-up of Syllabus helps everyone to plan ahead and to work systematically. This split up of syllabus is presented to all the stakeholders (students, teachers & parents) to help them to accomplish their goals. Each school is at the liberty to bring changes in it according to their requirement sticking to the suggested guidelines.

Hope this will help the teachers in designing and planning lessons for transacting syllabus and assessing students effectively during the current Academic Session.

DAV PUBLIC SCHOOLS

ODISHA ZONE – II

SPLIT-UP SYLLABUS FOR THE SESSION –2021-22

CLASS – VI

Managed By:

DAV College Managing Committee, New Delhi

DAV PUBLIC SCHOOLS, ODISHA ZONE -II

EXAMINATION RULES

STD VI

1. There will be Three Periodic Tests & one Annual Examination for Class VI.
2. The scholastic Area includes one Final Examination of 80 marks and internal Assessment of 20 Marks. The Internal Assessment of 20 Marks will be reflected for Half Yearly and Final Examination on the Report Card.
3. The 20 marks Internal Assessment includes 10 marks for periodic tests, 5 marks for notebook submission & 5 marks for Subject Enrichment Activity.
4. Three Periodic Written Tests will carry weightage of 10 marks each in all major subjects. Average of the best two tests(out of three) will be considered for Final Internal Assessment. However, marks obtained in the 1st Periodic Written Test will be considered for 10 marks of 20 marks Internal Assessment for Mid - Term Examination.

Details of Periodic Written Tests.

- | | |
|---|------------|
| (A) Pre - Mid Term Periodic Written Test | – 20 Marks |
| (B) Mid Term Periodic Written Test | – 80Marks |
| (C) Post - Mid Term Periodic Written Test | – 20 Marks |

5. The 5 marks for note book submission will address the critical aspects like
 - (a) Regularity in Submission.
 - (b)Timely Assignment Completion
 - (c) Neatness& upkeep of note book.
6. For the enrichment of the understanding and skill development of students in different subjects, respective subject teachers will conduct **four** subject enrichment activities of 5 marks each throughout the year. Out of which, two will be conducted before Mid - Term Periodic written Test and other two will be conducted after Mid - Term Periodic written Test. The best one of 1st two activities will be taken for 5 marks of 20 marks internal assessment of Mid -term Assessment & average of best one before Mid - term and best one after Mid-term will be taken for 5 marks of 20 marks internal assessment of Annual Examination.

Activities for different subjects.

- (i) Languages: – Activities for subject enrichment in languages should develop effective speaking and listening skills.
 - (ii) Mathematics: – Laboratory activities and projects.
 - (iii) Science: –Practical works /activities
 - (iv) Social Science: – Map works and Project works
7. The dates for Periodic Written Tests and Final Examination have already been fixed by the Examination Committee of the Zone after considering all aspects. However, they may change in certain unavoidable circumstances.
 8. Minimum 75% attendance is a pre-requisite criterion for promotion to the next higher class.
 9. It is mandatory for a student to appear in all the tests and activities. In case of sickness during tests or examination days, immediate information must be sent through application with medical certificate to the Principal. However, due to genuine reason, absence in **one** of the Periodic Tests may be permitted where average of the rest of the tests will be taken into account.
 10. The performance of a student in scholastic areas will be reflected in terms of marks as well as grades (8- Point scale) in the Report Card. A student has to secure minimum 'D' grade (33% marks) separately both in Annual Written Examination and Internal Assessment in each subject for promotion to the next higher class.

Part – I : Scholastic Areas (Grading on 8 point scale)

Grade	A1	A2	B1	B2	C1	C2	D	E (Needs Improvement)
Mark Range	91 - 100	81 - 90	71 - 80	61 - 70	51 - 60	41 - 50	33 - 40	32 & below

11. The performance of a student in Co - Scholastic areas will be conducted by teachers concerned on the aspects of regularity, patience, systematic approach, honesty, sincere participation, output & teamwork and will be reflected in terms of Grades only (3 Point A-C) in the Report Card .

Activity	To be graded on a 3-point scale in school by	Areas and Objectives
Work Education or Pre – Vocational Education	Teacher Concerned	Work education is a distinct curricular area for students for participation in social, economic and welfare activities .Students get a sense of community service and develop self –reliance.
Art Education	Teacher Concerned	Art Education constitutes an important area of curricular activity for development of wholesome personality of the students. Students will select one or more forms of creative art.
Health & Physical Education(sports/ Martial Art/Yoga/NCC etc)	The PET Teacher	Health & Physical Activity preferably sports must be given a regular period. Students should be provided opportunities to get professionally trained in the area of their interest. Indigenous sports, yoga and NCC must be encouraged in the schools creating a sense of physical fitness, discipline, sportsmanship, patriotism, self-sacrifice and health care.
Discipline	Class Teacher	It will be based on the factors like attendance, sincerity, behavior, values, tidiness, respectfulness for rules and regulations, attitude towards society, nation and others.

Part – II : Co-Scholastic Areas (Grading on 3 point scale)

Grade	A	B	C
Indicator	Outstanding	Very Good	Fair

NB.- No Descriptive Indicators in Report Card and no upscaling of grades will be done.

12. Students obtaining grade E in the subjects in scholastic area will have to appear for Improvement Test to improve their performance. They will get **only one chance** to obtain the qualifying grade.

LEARNING OUTCOMES

SUBJECT: MATHEMATICS

Sl. No	Class	Name of the Text Book	Chapter/ Lesson	Learning Outcomes
1	VI	Secondary Mathematics	Chapter-1 (Natural Numbers And Whole numbers.)	(1) Conversion of Hindu Arabic numerals to Roman numerals and vice versa (2) Students will learn develop the ability to understand successor and predecessor of given numbers. (3) Students will develop the ability to use of the properties of whole numbers in solving problems. (4) Students will be able to estimate the out comes of numbers in a reasonable guess of the actual value. (5) Students will be able to learn the use of brackets and the importance.
2	VI	Secondary Mathematics	<u>Chapter2 (Factors and multiples)</u>	(1) recognisesandappreciates(throughpatterns)thebroadclassificationof numbers prime, composite, co-prime, etc. (2) understands the concept of prime factorization and use of LCM and HCF of Numbers. (3) Develops his / her own strategy to identify appropriate situations to use the concept of LCM and HCF, its properties (4) applies HCF or LCM in a particular situation. (5) To understand the divisibility rules and check its divisibility.
3	VI	Secondary Mathematics	<u>Chapter-3(Integers)</u>	(1) Students use numbers with negative sign in day today life some examples of their use are temperature of a day, distance from surface to mine, etc. (2) Recognizes each and every integer can be represented on the number line. The integers to the right side of another integer is greater. (3) Solve problems involving any of the operations i.e. addition, subtraction, multiplication and division. (4) In exponent 5 power 3, five is called the base and 3 is called exponent or power. (5) Recognizes the Identity element for addition, identity element of multiplication and absolute value of integers.
4	VI	Secondary Mathematics	Chapter-(4) Ratio, Proportion And Unitary Method.	(1) Students should know comparing two quantities by division is called ratio. (2) To understand the meaning of proportion and the method of finding unknown value in a proportion. (3) uses unitary method in solving various word problems. For example, if thecostofadozennotebooksisgiven.studentsfindthecostof7notebooks by first finding the cost of one notebook.
5	VI	Secondary Mathematics	Chapter-5 (Percentage And Its Applications)	(1) understands the meaning of percentage. (2) concept of profit and loss. (3) expressing 1 quantity as a percent of another quantity. 4)to understand the formula of simple interest and use of formula in application of simple interest.

6	VI	Secondary Mathematics	Chapter-6(Introduction To Algebra)	(1) use of letters for unknown quantities. (2) to frame expressions. (3) knowledge of constant and variables. (4) to add and subtract algebraic expressions. (5) to find the value of algebraic expression.
7	VI	Secondary Mathematics	Chapter-7 Linear Equations	(1) to frame linear equations. (2) students will be able to solve linear equation. (3) you learn balance of an equation.
8	VI	Secondary Mathematics	Chapter-8 Basic Geometrical Concepts.	(1) To enable the students to understand about basic terms of geometry like points, lines, line segment, ray, plain, etc. (2) to enable students to identify points, line segment, line, etc. (3) to discuss among students about the properties of points, lines, line segment, ray, etc.
9	VI	Secondary Mathematics	Chapter-9 Line Segments	(1) to understand the line segments. (2) comparison of line segments. (3) Construction of line segments and learn how to measure line segment.
10	VI	Secondary Mathematics	Chapter-10 Angles	(1) to understand angles, unit of angles, measure of angles, different types of angles, interior and exterior of an angle and angular reason. (2) difference between adjacent angles and linear pair. (3) vertically opposite angles when two lines intersect are equal. (4) differentiate between complementary and supplementary angles.
11	VI	Secondary Mathematics	Chapter-11 (Transversal And Pair Of Lines)	(1) to understand transversal lines, interior angles and exterior angles are formed when two lines cut by a transversal. (2) Different angles formed when two lines are intersected by transversal. (3) to understand parallel lines.
12	VI	Secondary Mathematics	Chapter-12 Triangles	(1) the sum of three angles of a triangle is equal to 180 degree. (2) The sum of the length of any two sides of a triangle is greater than the length of third side. (3) to classify triangle according to sides and angles. (4) Students will be able to verify that the exterior angle of a triangle is equal to the sum of the interior opposite angles. (5) to understand interior and exterior of a triangle.
13	VI	Secondary Mathematics	Chapter-13(Circles)	(1) understands circle is a plane figure which is not made of any line segment. (2) students will learn elements of a circle. (3) relation between radius and diameter of a circle. (4) Understand chord of a circle, arc, semi-circle and circumference of a circle. (5) Students will be able to know how to construct a circle.
14	VI	Secondary Mathematics	Chapter-14 (Constructions)	(1) To understand the techniques and use of geometrical instrument. (2) Construct a perpendicular bisector of a given line segment and an angle equal to a given angle. (3) bisect a given angle using compass and ruler. (4) The perpendicular can be constructed to a given line from a given point which lies on the line and does not lie on the line. (5) A line can be constructed parallel to another line through a point not lying on it.
15	VI	Secondary Mathematics	Chapter-15 (Perimeter And Area)	(1) To find perimeter of a closed figure. (2) to find perimeter of a rectangle and Square. (3) to find area of a rectangle and Square.
16	VI	Secondary Mathematics	Chapter-16(Statistics)	(1) students will develop the ability to collect data and prepare tally mark table. (2) Draw and interpret pictograph. (3) Graphical representation of data, bar graph and construction of bar graph.

SPLIT-UP SYLLABUS(2021-22)

Class –VI

Subject- Science

Book prescribed: The Living World (A Book of Science and Technology) By DAV CMC

SPLIT UP SYLLABUS FOR			MONTH	CHAPTERS/ TOPICS TO BE TAUGHT	
ANNUAL EXAMINATION	MID-TERM PERIODIC TEST	PRE MID TERM PERIODIC TEST	APRIL	Ch 1- Our Environment Ch 3- Nature of Matter	Portion for Pre Mid-Term (Any 4 Chapters out of 5)
			JUNE	Ch 6-.Measurement and Motion	
			JULY	*Ch 4-Separation of Substances Ch 7 -The World of Living	
		AUGUST		Ch 5- Changes Around Us *Ch 12- Light and Shadows Ch 10- Work and Energy	
		SEPTEMBER		Revision for Mid-Term Periodic Test Mid Term Examination	
	POST MID-TERM PERIODIC TEST	OCTOBER		Mid Term Examination Ch 8- Structure and Function of Living Organisms – Plants	
		NOVEMBER		Ch 2- Food Ch 11-Electric Currents and Circuits	
	DECEMBER			Ch 9 - Structure and Function of Living Organisms – Animals	
	JANUARY			Ch 13-Magnets Ch 14-Fabric from Fibre Revision for Annual Examination	
	FEBRUARY			Annual Examination	

N.B- Significant topics of 1st term for annual examination-

Ch 4-Separation of Substances

Ch 12-Light and Shadows

QUESTION PAPER PATTERN

There will be a total of 30 questions in Sc. Written exam and student will get 3 hrs. to complete the paper. It will comprise of three sections - A, B and C. All the section and questions are compulsory, however, there will be internal choice given in each section.

Section - A : It contains 14 Objective type questions and all question in section A will be 1 Mark questions comprising MCQ , VSA type and Assertion - reason type question. The students are required to write one word or one sentence answer.

Section - B : All question in section B are 3 Marks and it has 10 short answer type question which are to be answered in about 50 to 60 words each.

Section - C : All question in section C are 5 Marks and it has 6 Long answer type question. These are to be answered in about 80 to 90 words each.

LIST OF ACTIVITIES

Activities for Pre-Mid Term(any two)	1.Make a project on Bio-degradable and Non-biodegradable substances
	2.Draw a diagram to show the balance between Oxygen and Carbon dioxide maintained by the nature and explain in brief.
	3.Make a model to show arrangement of particles in the three states of matter.
	4.Make a model of Pin hole camera.
Activities for Post-Mid Term(any two)	1 .Draw a complete Flower and label its parts and write their functions.
	2 . Make a list of different types of Food ,their sources and functions .
	3 .Enlist five precautions while using electricity and electrical appliances.
	4.Draw the Human digestive system , label its parts and write their functions.

LEARNING OUTCOMES

SUBJECT: SCIENCE

Sl.no	Chapter Name	Learning outcomes
1	Our Environment	- Students will be able to know about the biotic and abiotic components of our environment and able to distinguish between them. - Differentiate between biodegradable and non- biodegradable materials. - About various composting methods. - Interaction of abiotic components with the biotic component.
2	Food	- Students will be able to- Know about different nutrients. - List the functions of various nutrients and importance of balanced diet - Know the cause of various deficiency diseases.
3	Nature of matter	- Sort materials into groups according to their properties. - Insoluble / soluble in water -Transparent / Translucent / Opaque -Hard / soft / Translucent / Opaque -Appearance/ Dull /Shiny - Differentiate between natural and artificial material. - Different properties of matter
4	Separation of substances	- Know about various methods of separation: -Handpicking - Winnowing -Threshing -Sedimentation -Decantation - Sieving-Filtration - Compare evaporation and condensation - With the help of an activity find out whether water dissolves any amount of a substance.
5	Changes around us	- Categories the various changes around them as reversible and irreversible. Enhance their level of understanding of different changes by applying it in different situations around them. - Explain expansion and contraction - Conduct experiments based on various reversible and irreversible changes and draw inferences from them by reflecting critically on learning experience and processes.
6	Measurement and Motion	- List the various methods used in the earlier times for measurement of length and time. - Know about how to measure - explain different types of motion with the help of diagrams.

7	The World of Living	• Able to know about the different characteristics of living things • Classification of plants and animals on the basis of their common characteristics • Importance of plants and animals
8	Structure and Function of living organisms-Plants	• Students will be able to know about the plant root system and its modification in various plants. • Able to know about plant shoot system and its modification in various plants. • Able to know about leaf modification in various plants.
9	Structure and Function of living organisms- Animals	• To recapitulate the levels of an organism. • Different organ system and their structure and function. • Female reproductive system.
10	Work and energy	• Students will be able to explain the basic concept of work done and energy required. • Able to explain about the factors affecting the work done. • Able to know about various forms of energy.
11	Electric current and circuits	• List the uses of electricity and make arrangements of cell, wire and bulb and show how an electric current is produced. • Compare conductor and insulator. • Explain the construction and working of an electric cell, electric bulb and electric torch
12	Light and Shadows	• Students will be able to know how shadow are formed. • Know how light travels and the difference between shadows and image formed by plane mirror. • Pin hole camera • Differentiate between luminous and non luminous objects.
13	Magnets	• Discovery of magnet and know about artificial and natural magnet. • Different properties of magnet like attractive, repulsive and directional properties. • Explain the difference between magnetic material and non magnetic material.
14	Fabric from fibre	• Students will know and understand variety of fabrics, cotton fibre , jute fibre, spinning, weaving, knitting and history of cloth material. • Explain the process of cloth making. • Distinguish between weaving, knitting and spinning.

10 Principles of ARYA SAMAJ

With Eternal Truths

1. God is the primary source of all true knowledge and of all that can be known through it.
2. God is Existent, Intelligent and Blissful. He is Formless, Almighty, Just Merciful, Unborn, Infinite, Unchangeable, Beginningless, Incomparable, Immortal, Fearless, Eternal, Holy and the Maker of the Universe. To Him alone worship is due.
3. The Vedas are the scriptures of true knowledge. It is the duty of all Aryas to read them, hear them being read and recite them to others.
4. We should always be ready to accept truth and give up untruth.
5. All actions should be performed in conformity with Dharma, that is, after due consideration of right and wrong.
6. The primary aim of the Arya Samaj is to do good for all, that is, promote their physical, spiritual and social well being.
7. We should treat all people with love, fairness and due regards for their merit.
8. We should aim at dispelling ignorance and promoting knowledge.
9. One should not only be content with one's own welfare, but should look for it in the welfare of others also.
10. One should regard oneself under restrictions to follow altruistic rulings of the society, while all should be free in following the rules of individual welfare.
